Stk impression of glass "tube" with "filament" inside pulsing  
w/ light + energy

### Interim Summary

Idea of that this "apparatus" is electro magnetic in nature that two types or variations of e.m. fields or forces are brought together to produce a third force - it is this 3<sup>d</sup> force that they are trying to obtain + control. There's an idea of "beating" the 2 ~~var~~ fields together, to achieve some sort of "beat frequency".

Documents are many & come in "fibre bundles" or "books".  
They are "working" documents & are continually being added to.  
They are full of drawings - "schematics" - wiring diagrams,  
detailed discussion of assembly & construction, as well as  
precautions & safety concerns - the people working on it  
make very sure of each step before going on to the next.  
There are numbers, tables, drawings, "look-up" lists, with  
detailed directions for working with & on the apparatus.  
Conductivity is very important. If resistance in  
the system is too high, effects are degraded to the  
point they are useless or non-existent.

Paul Session #4, Project "N" - 3 June 1987

- ① Paul I want you to move into a Stage V Matrix and Stage 5 the coordinates themselves. Can you do that? "Yes. This could be interesting." 523887/688599
- ② "Did it work?" I don't know Paul but in your topics you mentioned Research - I would like you to do a Stage V of Research - "OK"
- ③ -Papers & Documents - Stage 5 The Papers and Documents - you made reference to Document, Documented, papers etc. let's stage 5 that concept
- ④ "I have an impression of a device with two types of electromagnetic forces being brought together to create another different force" OK, give me that in an interim Summary and then we will stage 5 the concept of documents/papers -
- ⑤ "I can't do both" OK Paul do Stage V on Documents.
- ⑥ Don't rush it Paul (Long delay - 512015) - I'm going to re-occur because I know there is more here.
- ⑦ ~~Can you~~ ~~Is~~ you think you can acquire anymore information on the documents? "No" OK please summarize your perception and we will terminate the session at this time -
